

Circle: Iraq, the United Nations and sanctions

- ◆ The situation in Iraq highlights the plight of the Muslims of Iraq and the ability of the major powers to act as they please in the international arena.
- ◆ It is clear that the United Nations is a tool for America and that the leading nation uses and abuses international law as it pleases.

"Verily those who disbelieve spend their wealth to hinder (men) from the way of Allah and so they will continue to spread it, but in the end will become an anguish for them. They will be overcome And those disbelievers will be gathered in Hell" [Surah al Anfal Verse 36]

- ◆ The Khilafah will shake the international arena and expose the oppression of America and the United Nations.
- ◆ We have to take lessons from the life of the Prophet (saw) and how he dealt with the international order at his time.
- ◆ The Khilafah will use the resources and energies of the Ummah to challenge the leading nation. We will ignore any sanctions placed upon us. The Khilafah will seek to trade with other nations as the Muslim lands have major resources like Oil, Gas, etc which are valued resources to all countries.
- ◆ During the gulf war Muslims all over the world supported Iraq even though they knew that Saddam was a tyrant. Imagine what will happen when we have a Khalif ruling by Islam – the Muslims will immediately support the Khilafah when they see it standing up to America.
- ◆ We need to destroy the defeatist mentality that the Muslim Ummah is weak and unable to solve its problems.
